SKILLS

- **Languages:** SQL, Python, Java, C++, C, Data Structures and Algorithms
- **Technical Skills:** Pandas, NumPy, Seaborn, Matplotlib, Scikit-learn (EDA), NLP
- **Tools/Platforms:** MySQL, VSCode, Jupyter Notebook, PowerPoint, Excel
- **Soft Skills:** Time management, Adaptability, Critical thinking

PROJECTS

QurikSpace Student Freelancing Platform | [GitHub](#)

April 2026 - June 2026

- Built a full-stack Django web application that enables students to post, offer, and hire freelance services with secure user authentication and role-based access control.
- Developed core backend functionalities including gig management, order processing, real-time messaging, and review/rating systems using a scalable REST-based architecture.
- Deployed the application on Render, managing production configuration, routing setup, debugging, and ensuring smooth live deployment and accessibility.

Intent Behind Silence Predictor | [GitHub](#)

Feb 2026 - Mar 2026

- Developed an NLP-based model to predict user intent from delayed responses using TF-IDF, temporal features, and custom linguistic signals.
- Trained and evaluated machine learning models (Logistic Regression, Random Forest) for multi-class intent classification with strong performance.
- Built and deployed an interactive Streamlit web app for real-time predictions and probability visualization.

Food Delivery Time Analysis & Prediction | *Python, Pandas, Matplotlib, Seaborn* | [GitHub](#)

Mar 2025 - May 2025

- Analyzed key factors affecting food delivery time to improve operational efficiency using Python-based data analytics and machine learning.
- Performed data cleaning, preprocessing, exploratory data analysis, and built predictive models to identify the most significant contributors to delivery delays.
- Improved delivery-time prediction accuracy by 18–22%, generating insights that can help optimize routing, staffing, and order handling.

TRAINING

Machine Learning with Data Science | Cipher Schools | [Link](#)

Jun 2025 - Jul 2025

- Learned to design and implement an end-to-end machine learning pipeline for predicting customer purchase likelihood.
- Gained hands-on practice in data cleaning, feature encoding, exploratory data analysis (EDA), and feature engineering on real-world datasets.
- Applied Logistic Regression and Decision Tree algorithms to train, evaluate, and compare predictive models.
- Improved skills in interpreting model performance and extracting actionable insights for data-driven marketing decisions.

CERTIFICATES

- Machine Learning For All | Coursera | [Link](#) Sep 2025
- Introduction to Artificial Intelligence| Coursera | [Link](#) Sep 2025
- The Bits and Bytes of Computer Networking| Coursera | [Link](#) Aug 2025

EXTRA CURRICULAR ACTIVITIES

- Engaged in the Shark Tank AIT event organized by the Army Institute of Technology, Pune. Oct 2025
- Competed in the Hult Prize On Campus Program focused on social-entrepreneurship innovation. Sep 2025

EDUCATION

- **Lovely Professional University** Phagwara, Punjab
BTech CSE - Data Science and Data Engineering | CGPA: 7.13 Aug 2023 - Present
- **Sasi Educational Institution** Vizag, Andhra Pradesh
Intermediate | Percentage: 91 Jun 2021 - Mar 2023
- **Unique Public School** Nabarangapur, Odisha
Schooling | Percentage: 65 Jun 2020 - Mar 2021
